

HUIGUO LIU

Data Analyst | SQL, Python, Excel, Power BI, Tableau

Minneapolis, MN (Open to relocation) • (612) 868-5599 • liu01959@umn.edu • <https://www.linkedin.com/in/huiguo-liu>

SUMMARY

Business Analytics MS graduate (Carlson, Aug 2026) with experience in data preparation, validation, reconciliation, reporting, and dashboard development. Reconciled multi-system data for a Carlson Analytics Lab client and built recurring KPI reporting over 14K+ monthly records at a securities firm. Works in SQL, Python, Excel, Power BI, and Tableau.

EDUCATION

UNIVERSITY OF MINNESOTA, Minneapolis, MN

Master of Science in Business Analytics (*Carlson School of Management*)

Aug 2026

Bachelor of Arts in Economics, Minor in Management (*College of Liberal Arts*)

May 2025

EXPERIENCE

UNIVERSITY OF MINNESOTA | CARLSON ANALYTICS LAB, Minneapolis, MN

Analytics Student Consultant

Oct 2025 – Sep 2026

Client: YMCA of the North

- Consolidated 33 raw extracts from two membership systems into a DuckDB pipeline covering 539K members and 9.4M engagement records, improving cross-system ID match rates from 50% to 79% using a two-key matching strategy.
- Derived four behavior-based member segments across 336K members, showing annual retention from 60% in the minimal-engagement group to 89% among loyal regulars and flagging the largest for early intervention.

Client: 4MATIV Technologies

- Developed a data-quality and trip-performance framework across 15K school-bus trips and 2.35M GPS records, combining multiple signals to evaluate vendor performance despite incomplete and noisy data.
- Performed root-cause analysis on spatial data issues, identifying 35% of trips as unverifiable and five routes with the most severe data-quality issues to support targeted vendor and operational reviews.

Client: Central Specialties Inc

- Cleaned, classified, and analyzed 1,661 construction-auction records across six Midwest states using Excel and Tableau, evaluating bid accuracy, win rates, and competitive positioning.
- Built a Tableau dashboard visualizing bid distributions, county-level win rates, and competitor patterns, identifying grading and earthwork projects as categories with approximately \$1M average overbid.

GREAT WALL SECURITIES, Beijing, China

Equity Research Intern

May 2024 – Aug 2024

- Cleaned, validated, and integrated 14K+ monthly customs records using Python, pandas, and Excel, producing analysis-ready datasets across products, provinces, countries, and regions.
- Built reusable Python and Excel reporting workflows producing two recurring monthly export reports with KPI tables and summary charts on export volume, regional mix, and product-level trends.
- Automated recurring data extraction and chart generation with Python and Wind/iFinD across 240+ export markets, standardizing reporting across 31 months of history and reducing manual rework.

PwC, Shanghai, China

Strategy Project Assistant

Jan 2024 – Mar 2024

- Built Tableau dashboard-style summaries comparing unit economics across 20+ coffee stores and 3 major chains, highlighting pricing, sales volume, payback period, and margin drivers behind scalable store formats.
- Benchmarked 150+ store locations across 29 cities, mapping pricing, store format, sourcing model, and brand positioning to surface expansion opportunities in China's coffee market.
- Translated unit economics and benchmarking work into expansion recommendations, informing which store formats to scale and how to approach Tier-2 city entry.

ANALYTICS PROJECTS

Predictive Modeling: Built and evaluated a rank-blended XGBoost ensemble on Santander customer data using Python and feature engineering, achieving 0.83 private AUC and ranking Top 5% among 5,236 Kaggle teams.

Process Analytics: Analyzed enterprise travel and process-mining data using SQL and Tableau, identifying out-of-policy travel as associated with 46.3% higher carbon emissions; project placed Top 3 in the Analytics for Good Hackathon.

TECHNICAL SKILLS

- BI & Reporting:** Power BI, Tableau, Excel (Power Query, Pivot Tables, XLOOKUP/VLOOKUP), KPI Reporting
- Data & SQL:** SQL (window functions, CTEs), Python, pandas, DuckDB, BigQuery, Data Cleaning, ETL/ELT
- Analytics:** Statistical Analysis, A/B Testing, Time Series Forecasting, Segmentation, Predictive Modeling
- Platforms & Tools:** Databricks, PySpark, Git, Jira, PowerPoint
